Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of species I (Fig. 2), corresponding to claims 1-16 in the reply filed on 16 November 2006 is acknowledged. Claims 17-30 were canceled by Applicant.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 5, 6, 11 and 12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is unclear how the individual cross-sectional profiles can be considered to be substantially the same as the combined cross-sectional profiles, when they appear quite different. In no case do they appear circular or substantially the same. Nevertheless, to the degree that they are deemed to be so, for examination purposes, Foley et al., likewise, is deemed to possess the cross-sectional profiles since there is no guidance set forth in the claims as to what can and cannot be considered to "substantially" be the recited profile.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Foley et al. (6,193,757; cited by Applicant).

Foley et al. disclose a device 80 for treating vertebrae comprising biocompatible rigid members 82, 84 having ribs 88 (and the walls surrounding channel 86) extending along a common base thereof (see, e.g., Figs. 13-16). The members are hinged together via portion 98. The device is collapsed and inserted into an intervertebral space and then disengaged and deployed to stabilize the adjacent bone (see Fig. 9a). A treatment medium **G** is introduced into the space between the members after deployment. Foley et al. clearly disclose the claimed invention except for both of the members having a plurality of ribs. However, it would have been obvious to have provided more ribs on both members, since it has been held that mere duplication of the essential working parts of a device involves only routine skill in the art. *St. Regis Paper Co. v. Bemis Co.*, 193 USPQ 8. Moreover, doing so would have provided increased and/or enhanced guiding support for the device.
